

Figure 6-14 (Added) Placement of the California Wing Patch. The California Wing Patch is worn so that the center of the top edge of the patch is 3/4 inch below the shoulder seam. The patch will be worn on the optional Ground Team uniform, BDU, Field Uniform, CAP Utility Uniform and all flight suits. On jackets that have epaulets, center the patch below the epaulet. On garments without epaulets, place the patch so that the top center edge of the patch is 3/4 inch below the highest point of the shoulder seam as worn. The California Wing Patch will be removed from the blue Air Force shirt and all Air Force outer garments except BDU and green flight suit/jacket by 31 July 2006.
